Produkte|Standards|Erfahrungen

Extensive Experience in Design and Deployment of robust redundant and scalable IP networks, IP/MPLS based L2/L3 VPN Services and Data Center Environments.

Berufliche Erfahrungen

Zeitraum: 03/2012 - heute

Firma/Institut: Xantaro Deutschland GmbH

Kunde / Branche: Xantaro Deutschland GmbH

Projektbeschreibung: Senior Consultant Service Providers, Berlin , Germany

- Aufgaben:
- Introducing of new technologies in service provider network
- Design of ISIS/MPLS and BGP-based backbone routing concepts
- EVPN)
- Implementation of Native Fibre Channel and FCoE in Data Center (Cisco)
- Deployment of Cisco UCS in Data Center
- Configuration and Troubleshooting of FabricPath and vPC+ Domains
- Basic Knowledge of Cisco ACI (Application Centric Infrastructure)

Systemumgebung: Juniper), Design and Implementation of Cisco Nexus 7K, 5K, 2K and Nexus 1000v

Zeitraum: 05/2001 - heute

Firma/Institut: Fraunhofer Institute for open communications systems

Kunde / Branche: Fraunhofer Institute for open communications systems

Projektbeschreibung: NGN R&D, Berlin , Germany

- Aufgaben:
- Department of Integrated Mobile Systems
- R&D in the field of VoIP and Next Generation Networks
- Development of a voicemail system for VoIP communication inclusive reception system and operation interfaces.
- Development of a conference reservation system for VoIP applications.
- Development of simulation models for the evaluation of new concepts for data exchange in mobile environments.

- During this time I worked on various research projects relating to Next
- Generations Networks (NGN), QoS, multimedia communication, VoIP and security. I was a member of the iptel.org project which has resulted in the development of the widely used SIP Express Router.

Zeitraum: 02/2011 - 02/2012

Firma/Institut: Vodafone Kabel Deutschland GmbH

Kunde / Branche: Vodafone Kabel Deutschland GmbH

Projektbeschreibung: Senior Network Engineer, Berlin , Germany

- Aufgaben:
- Alcatel-lucent and Huawei)
-

=====

Zeitraum: 04/2007 - 01/2011

Firma/Institut: M-net Telekommunikations GmbH

Kunde / Branche: M-net Telekommunikations GmbH

Projektbeschreibung: Senior Network Engineer / Project Manager, Munich , Germany

- Aufgaben: working at M-net in the area of IP Networking (Planning, Design, Implementation juniper and ADVA routers and switches). I was responsible for the end-to-end solutions in converged triple play (HSI, VoIP, IPTV) networks, national and international MPLS VPNs, IP and VPNs Multicast and of the end-to-end QoS solutions. I was the technical project manager of the Bit-Stream Access-Network
- (FTTH/FTTB) based on GPON. I also led the multilateral cooperation talks and workshops with
- Deutsche Telekom and a various of others city carriers, which should be result in the specification of the interfaces, transport services and technical parameters needed for a wholesale Bitstream access product.

=====

Systemumgebung: and Troubleshooting of IP/MPLS Backbone, consisting of Cisco, Alcatel-lucent

Zeitraum: 02/2006 - 11/2006

Firma/Institut: MeidaTeamIT

Kunde / Branche: MeidaTeamIT

Projektbeschreibung: Network Academy Student, Berlin , Germany

- Aufgaben:
- Cisco Systems Academy program CCNA / CCNP
- The Cisco CCNA network associate certification validates the ability to install, configure, operate, and troubleshoot medium-size routed and switched networks, including implementation and verification of connections to remote sites in a WAN. This certification includes basic mitigation of security threats, introduction to wireless networking concepts and terminology, and performance-based skills. It also includes (but is not limited to) the use of these protocols: IP, Enhanced Interior Gateway Routing Protocol (EIGRP), Serial
 - Line Interface Protocol Frame Relay, Routing Information Protocol Version 2
 - (RIPv2), VLANs, Ethernet, access control lists (ACLs).
- CCNP certification validates a network professional's ability to install, configure and troubleshoot converged local and wide area networks with 100 to
 - 500 or more nodes. Network Professionals who achieve the CCNP have demonstrated the knowledge and skills required to manage the routers and switches that form the network core, as well as edge applications that integrate voice, wireless, and security into the network.
